Title of the Practice:

Green Initiatives and Environment Friendly Campus

Green campus initiatives are becoming integral part of the modern-day education system and the institutions can act as pioneers in promoting these principles within society. Our college has initiated the green campus program in order to support a **sustainable and climate-friendly environment**.

Objectives

- Minimize the energy consumption by use of energy efficient equipment.
- Maximize use of day light and natural ventilation.
- Segregating solid waste on daily basis.
- To ensure continuous supply of water throughout the year
- To replenish ground water through rainwater harvesting.
- To plant sufficient number of trees, potted plants every year and keep the campus green

The Context: Our main focus behind this Green campus program is to ensure the sustainability of sufficient water, materials and other resources for our future generation. But the main challenge is the proper translation of the education for sustainable development into practice so that it can be more effective. Any new development should consider and maintain the proper balance of economic, social and environmental conditions and the participation of all the staff members and students is very important. More stress is being given on the proper infrastructure development so as to continue and maintain the green practices.

The Practice: The college has developed a beautiful campus with lawns, a botanical garden, etc. The college has preserved the existing flora and fauna within the campus. Signboards/posters are displayed on the college campus to encourage ideas of plastic-free campuses, noise pollution, and environmental awareness. Rain water Harvesting, re-use of paper, The college organizes international conferences, workshops, etc. on environment-related issues. LED bulbs are installed in the college buildings and the campus to save electricity.

Evidence of Success: This best practice has proven to be successful through the following activities:

- Through periodical tree plantations, flora and fauna on the campus have been enriched, resulting in the transformation of the campus into an eco-friendly one.

- An awareness campaign for the plastic-free campus through signboards and display boards has made the campus overall plastic free.
- Through workshops/seminars/NSS/Nature Club, students are made aware of the various environmental issues.
- A mandatory course on environmental awareness at the B.A/ /B.Com level is taught.

Problems Encountered and Resources Required:

While carrying out this practice, the following problems are encountered by the college:

- Green Campus initiatives are challenging, so they require determination and a long-term commitment from all the stakeholders.
- The Green Campus initiative is a rather expensive practice. It needs expert advice and an investment of resources.
- Sufficient manpower is needed to sustainably maintain green practices.
- Lesser awareness among the students and community towards environmental issues aggravates the problem levels.
